A horizontal row of twelve abstract line drawings, each consisting of a small black circle and a wavy line. The drawings are arranged in two columns of six. The first column contains: a wavy line ending in a circle; a circle with a wavy line extending from its top; a vertical line with a circle at its top; a circle with a wavy line extending from its bottom; a circle with a wavy line extending from its left side; and a circle with a wavy line extending from its right side. The second column contains: a vertical line with a circle at its top; a vertical line with a circle at its bottom; a circle with a wavy line extending from its top; a vertical line with a circle at its bottom; a circle with a wavy line extending from its left side; and a circle with a wavy line extending from its right side.

A horizontal row of ten small diagrams, each consisting of a loop with a dot and a line segment. The configurations vary: some show the line segment as a straight line, while others show it as a curved or bent shape. Some diagrams include additional small circles or dots on the line segments.

A diagram consisting of two separate curved arrows pointing to the right. Each arrow has a small open circle at its end point.

०

The diagram consists of several black line segments and small circles representing nodes. There are two main vertical columns of nodes. The left column has three nodes connected by a single vertical line. The right column has four nodes connected by a single vertical line. Between these columns are several horizontal connections: one node from the top of the left column is connected to the bottom of the second node in the right column; another node from the middle of the left column is connected to the middle of the third node in the right column; and a third node from the bottom of the left column is connected to the top of the fourth node in the right column. Additionally, there are two curved connections: one from the middle node of the left column to the middle node of the right column, and another from the bottom node of the left column to the bottom node of the right column.

Three abstract line drawings on a black background. The first drawing on the left is a white line forming a large, irregular loop with a small circle at the bottom right corner. The second drawing in the middle is a white line forming a large, irregular loop with two small circles, one near the top and one near the bottom right corner. The third drawing on the right is a white line forming a vertical rectangle with a small circle at the bottom right corner.

The image contains seven separate line drawings arranged horizontally. Each drawing features a looped line with two small circles, one at each end of the loop. The configurations vary: the first shows a vertical line with a horizontal loop; the second shows a vertical line with a curved loop; the third shows a vertical line with a loop that has a small loop attached to its right side; the fourth shows a vertical line with a loop that has a small loop attached to its left side; the fifth shows a vertical line with a loop that has a large curved loop attached to its right side; the sixth shows a vertical line with a loop that has a small loop attached to its left side; and the seventh shows a vertical line with a loop that has a small loop attached to its right side.
